Several modern interpretations of Paul's letter to the Galatians claim to uncover an underlying attitude of anti-Judaism. Michael Bachmann refutes those claims with his own detailed exegesis and astute examination of comparative material from the religious environment of that day, revealing instead how Paul embraces both Jews and Gentiles. Bachmann holds that, in the

determination of meaning, the literary context of Galatians should be considered over historical background. / Nonetheless, he does engage parallels in Qumran material and archaeology as secondary methods to confirm his exegetical arguments. Through his rigorous examination, Bachmann shows that Galatians exhibits evidence of anti-Judaism not in itself, but only in its reception. / Rich in scholarship and sound exegesis, Anti-Judaism in Galatians? is an ideal text for scholars and students seeking the whole truth about Paul. This book examines the development of the modern food system around

contemporary agriculture, food processing, ecological systems and changes in women's employment in challenging our perception of our position within a natural system. The theory and service of modern automotive engines is at the heart of this new edition. It includes practical information on variable valve timing systems, hybrid and other advanced technology vehicles, plus more engine performance diagnostic information and current NATEF content. This volume describes methods and protocols for a number of drugs and toxins in a

stepwise manner. Chapters in the book cover a wide array of topics such as: quantitation of Flecainide, Mexiletine, Propafenone, and Amiodarone in Serum or Plasma; quantitation of total Buprenorphine and Norbuprenorphine in Meconium; quantitation of Carisoprodol and Meprobamate in Urine; and quantitation of Tricyclic Antidepressants in Serum. Each chapter contains a brief introduction to the topic, clinical utility of the analyte(s), and useful notes to help laboratorians easily reproduce the protocols discussed. Written in the highly successful Methods in

Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and thorough, *Clinical Applications of Mass Spectrometry in Drug Analysis: Methods and Protocols*, is a great resource for laboratorians who are already using mass spectrometry or thinking of introducing this technology to their laboratories. Here is a rhetorical treatment of Karl Barth's early theology. Although

scholars have long noted the rhetorical power of Barth's work, calling it volcanic and explosive, this book uses rhetoric to illuminate the peculiar nature of his prose. It displays a Barth whose prose is radically unstable and inseparable from his theological arguments. The author connects Barth's early theology to the Expressionism of the Weimar Republic. He develops an original theory of figures of speech, relying on the philosophies of Paul Ricoeur and Hayden White, to delve more deeply into the particular configurations of Barth's writings. Nietzsche's hyperbole and

Kierkegaard's irony are examined as rhetorical precedents of Barth's style. The closing chapter surveys Barth's later, realistic theology and then suggests ways in which his earlier tropes, especially the figures of excess and self-negation, can serve to enable theology to speak today. A guide to designing and implementing VPLS services over an IP/MPLS switched service provider backbone Today's communication providers are looking for convenience, simplicity, and flexible bandwidth across wide area networks-but with the quality of service and control

that is critical for business networking applications like video, voice and data. Carrier Ethernet VPN services based on VPLS makes this a reality. Virtual Private LAN Service (VPLS) is a pseudowire (PW) based, multipoint-to-multipoint layer 2 Ethernet VPN service provided by service providers By deploying a VPLS service to customers, the operator can focus on providing high throughput, highly available Ethernet bridging services and leave the layer 3 routing decision up to the customer. Virtual Private LAN Services (VPLS) is quickly becoming the number one choice for many

enterprises and service providers to deploy data communication networks. Alcatel-Lucent VPLS solution enables service providers to offer enterprise customers the operational cost benefits of Ethernet with the predictable QoS characteristics of MPLS. with the movement known as Secession or Art Nouveau. The author presents and defines the individual and common features of the work of F. Bílek, S. Suchard, L. Saloun, Q. Kocian, J. Maratka, B. Kafka and J. Stursa. The author focuses on their creative, as well as individual contributions, and he also appreciates their common tendency towards being human, i.e. humans placed within the universal myth of his origins and mission. The book is abundantly illustrated and is designed for the general reader as well as the specialist. This volume is aimed at those who are concerned about

Chinese medicine - how it works, what its current state is and, most important, how to make full use of it. The audience therefore includes clinicians who want to serve their patients better and patients who are eager to supplement their own conventional treatment. The authors of the book belong to three different fields, modern medicine, Chinese medicine and pharmacology. They provide information from their areas of expertise and concern, attempting to make it comprehensive for users. The approach is macroscopic and philosophical; readers convinced

of the philosophy are to seek specific assistance. Our relationship with money is one that lasts a lifetime, yet traditionally books on the subject tend to take one of two routes: a) how to get more, or b) how to deal with less. John Armstrong turns these approaches upside down, and looks not at money itself, but at how we relate to it and the meaning we attach to it. How does it drive us and frighten us? Can it change the world for the better? And how much do we actually need? Offering surprising and helpful new insights, this book will encourage you to redefine your feelings about money, and

ultimately enable you to discover what is really important to you in life. One in the new series of books from The School of Life, launched May 2012: How to Stay Sane by Philippa Perry How to Find Fulfilling Work by Roman Krznaric How to Worry Less About Money by John Armstrong How to Change the World by John-Paul Flintoff How to Thrive in the Digital Age by Tom Chatfield How to Think More About Sex by Alain de Botton Every year millions of people pack up their belonging and move into a new residence. Historically, it gives examples of the influence of groundwater on battlefield tactics and fortress construction; describes how groundwater was developed for water supply and overcome as an obstacle to military engineering and cross-country vehicular movement by both sides in World Wars I and II; and culminates with

examples of the application of hydrogeology to site boreholes in recent conflicts, notably in Afghanistan. Examples of current research described include hydrological model development; the impact of variations in soil moisture on explosive threat detection and cross-country vehicle mobility; contamination arising from defence sites and its remediation; privatization of water supplies; and the equitable allocation of resources derived from an international transboundary aquifer. A stunning survey of the rarely seen book designs of Czech artist Josef

Capek Josef Capek (1887-1945) was one of Czech modernism's most formative protagonists. The artist first studied weaving before finding his *métier* as both a painter and designer. During a short stint in Paris, he befriended the poet Guillaume Apollinaire, who was then the leading theorist of and driving force behind Cubism. Capek adopted the Cubist style, fusing it with moodier elements of Expressionism and Symbolism to create a uniquely Czech take on the style. Alongside his work as a painter, Capek designed several hundred book covers from 1918 until his death

in 1945 for Czech publications of early twentieth-century authors such as Apollinaire, Karel Capek, Jan Bartos, Josef Hora, Josef Kopta, Pierre Mac Orlan, Giovanni Papini, Pirandello, Miroslav Rutte and Georg Trakl and nineteenth-century authors such as Flaubert, Goethe, Kropotkin, Sheridan Le Fanu and Arthur Machen. Capek's designs were much celebrated in Czechoslovakia for their simplicity and their virtuoso use of linocut. Itself a beautiful publication, *The Book Design of Josef Capek: Seeing The Book* presents a fully-illustrated and complete survey of this rarely seen work. In a

series of entertaining essays, geoscientist Jelle Zeilinga de Boer describes how early settlers discovered and exploited Connecticut's natural resources. Their successes as well as failures form the very basis of the state's history: Chatham's gold played a role in the acquisition of its Charter, and Middletown's lead helped the colony gain its freedom during the Revolution. Fertile soils in the Central Valley fueled the state's development into an agricultural power house, and iron ores discovered in the western highlands helped trigger its manufacturing eminence. The Statue of Liberty, a

quintessential symbol of America, rests on Connecticut's Stony Creek granite. Geology not only shaped the state's physical landscape, but also provided an economic base and played a cultural role by inspiring folklore, paintings, and poems. Illuminated by 50 illustrations and 12 color plates, *Stories in Stone* describes the marvel of Connecticut's geologic diversity and also recounts the impact of past climates, earthquakes, and meteorites on the lives of the people who made Connecticut their home. All the practice you need for a top score in the Cambridge English: Preliminary (PET). First published in 1964, Psychology and Social Problems looks at a changing society

and research into problems of the time. Many of the themes in the book, such as delinquency, mental health and racial conflict, are still familiar and current topics of discussion today. Social scientists had carried out extensive research into problems of urgent public concern, yet their findings were not widely known or understood and they had often been diffident in advocating policies based on their conclusions. Michael Argyle discussed the recent psychological and social research bearing on the origins of aggression, delinquency, mental

disorder, racial and international prejudice, and industrial discontent; he went on to consider the implications of these studies for prevention and control and for the guidance of social change. This sophisticated and well-documented critique is presented with such lucidity and verve that it will appeal equally to laymen and to students and professional workers and can now be enjoyed in its historical context.
